

Where Will Douay Lead You?

Where did some of our Year 13's go to University in 2020?

“Through a combination of small class sizes, excellent facilities and an extremely supportive teacher body, I was able to secure a place at Oxford University. It is on this basis that I recommend The Douay Martyrs Sixth Form to any student who wants to reach their full potential.”

The University of Oxford — History

“I stayed at the Douay Sixth Form because it helped me open new doors in which I found my true passion for mathematics and gave me the confidence to nurture my potential. I had built up a good relationship with the teachers who encouraged and supported me throughout my A-Levels. I thoroughly enjoyed my time at Douay due to its active, lively and friendly atmosphere where I was treated with great respect. With Douay’s support I’m pleased to say that I’m now going to Warwick University to study Mathematics.”

University of Warwick — Mathematics

“Being at Douay Sixth Form means being surrounded by supportive teachers who will drive you to do what’s best for you. It’s because of this support that I’m able to study Physics at UCL this year.”

King’s College London — Physics

“Douay Martyrs Sixth Form was great, it was such a great community and a genuinely welcoming and kind atmosphere. The teachers were always supportive and there for you if you needed any kind of help. I'm now going off to Middlesex University to study Music!”

Middlesex University — Music

“Why I stayed at Douay?
The teachers! This was the main pulling factor for me choosing to study my A-Levels at Douay. The quality of teaching and the drive of teachers go above and beyond is something that you would be lucky to find anywhere else. It really makes you believe that you are capable of pursuing the top universities.

What was my time like at Douay?

My entire secondary education was at Douay and I wouldn't have wished it to be anywhere else. The experiences I gained both academically and socially were truly special and helped me get to where I am now.

What I am going to study and where?

I am going to study Medicine at Imperial beginning October. This would not have been possible at all without the support and efforts of ALL the staff at Douay that were involved in my education, so I am extremely grateful to them!”

Imperial College London — Medicine

“My time at Douay's Sixth Form meant being consistently pushed and encouraged to achieve my maximum potential without overworking. It's through this encouragement I was able to attain a place to study Physics at Imperial College London.”

Imperial College London — Physics

“Staying at Douay allowed me to study in a small and familiar community where subject teachers could always provide help and advice specifically tailored for me. This, alongside the Sixth Form’s thorough support with UCAS, enabled me to get the grades I needed to study Engineering and Architecture at UCL.”

UCL — Engineering & Architectural Design
