Dear Parent/Carer,

The Science Department will be doing a setting test for KS3 week commencing **2nd December 2019**. The results from all tests will be used to re-evaluate the classes students are in for the next term. To ensure your child performs the best they can in the test it's advisable they revise at home on a regular basis. The topics they should revise are listed below in this letter. Students will have notes on these topics in their science book.

Year 8 topics: Adaptations (animals and plants), Chromosomes, Fertilisation, Food webs, Interdependence, Life cycle of animals, Menstrual cycle, Natural selection, Pollination and Variation

Useful website:

<http://www.bbc.co.uk/education/subjects/zng4d2p>

To aid their revision further students should use flash card, quizzes, mind maps and posters. Some of these resources may have been made in class. Please encourage students to make more flash card with quizzes on them and use them regularly, as well as making revision posters.

Revision guides can be purchased from the Science Department for £6.00. The revision guide covers content for Year 7 and 8 materials.

On the day of the science test it is advisable that students to get up a little earlier to avoid them rushing around, make sure they have a nutritious breakfast, to be positive about them doing their best in the test.

Kind regards.

Yours faithfully

D Shah
